Art Unit: 1775

1. Applicant's election of Group II in the reply filed on 2/28/06 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 1, 5-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/28/06.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sumitomo Electric Ind co (EP 117488).

Sumitomo Electric Ind Co discloses conductive diamond like carbon with a metal such as copper (table 1, sample 6) yet Sumitomo Electric Ind Co does not explicitly disclose a slip ring.

It would have been obvious to one of ordinary skill in the art to provide this coating on a slip ring as it can be included in the general term conductor disclosed in Sumitomo Electric Ind Co.

Art Unit: 1775

5. Claim 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Sumitomo Electric Ind Co (as above) in view of Nissin Electric Co Ltd (JP 06-275174).

Sumitomo Electric Ind Co discloses the invention as claimed except for an interfacial layer between the carbon and substrate.

Nissin Electric Co Ltd discloses the known use of an interfacial used to adhere a diamond like (same as hard carbon) coating onto a substrate.

Thus it would have been obvious to one of ordinary skill in the art to provide the coating of Sumitomo Electric Ind Co onto the said substrate through the claimed layer as this technique is well known in the art to attach diamond like coating to a substrate as shown by Nissin Electric Co. Ltd.
